This regulator type can be used whenever it is necessary to obtain a constant fluid flow irrespective of the pressure variations present upstream or downstream. It is fitted with a third T line for discharging any excessive flow rate.

QC.3.3... 3 WAY COMPENSATED

When the reverse flow check valve is needed, the check valve holder type "AM.3.ABU.3..."can be fitted underneath the valve. (The check valve holder must be ordered separately see page III•4)
