Remote controls

System description

These are remote controls with flexible cables.

They allow to install the directional control valve close to the hydraulic circuit components and to install the remote control in an ergonomic position.

TCC series Remote controls with flexible cables

- Up to 10 sections
- Low actioning efforts
- Detents, safety lever, several types of knob available
- TCC5 recommended for SD4, SD5, SD6, SDM080 and DF5 valves;
TCC10 recommended for other valves

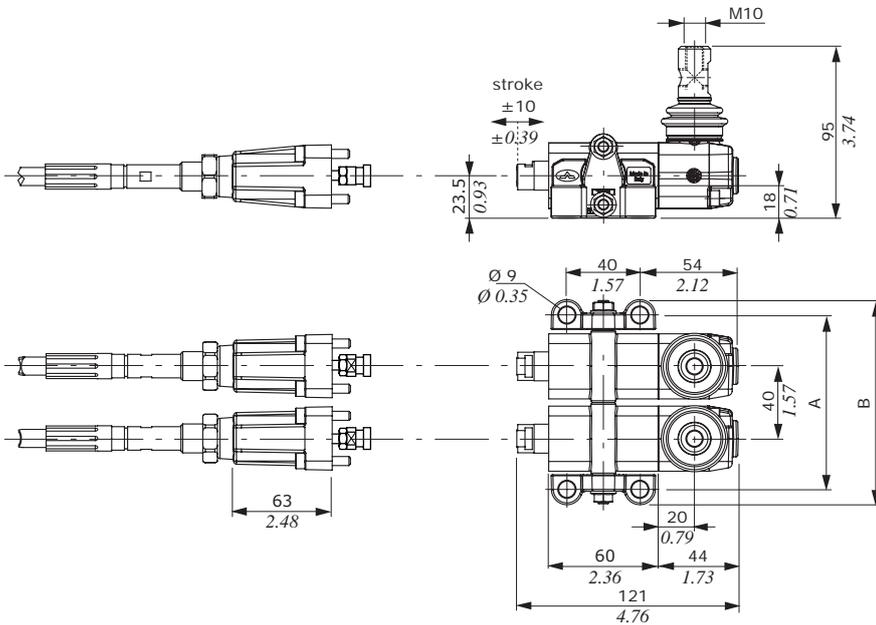

Working conditions

Max. load: in traction	1450 N - 340 lbf
in compression	880 N - 200 lbf
Minimum recommended bend radius	R = 150 mm - 5.9 in
Working temperature	from -40 to 80 °C - from -40°F to 176°F
Maximum recommended length	4000 mm - 157.48 in

NOTE: the features are referred to remote controls with flexible cables

SCF031 series Flexible cable remote control joystick

- Mechanical safety lock
- Ergonomic handles with push-buttons available
- Single or dual spool operation for a 2 section directional valve
- High efficiency
- Body, rubber boot and knob made in self-extinguishing and recyclable plastic polymer

Working conditions

Max. load: in traction	1400 N - 315 lbf
in compression	900 N - 202 lbf
Minimum recommended bend radius	R = 150 mm - 5.9 in
Working temperature	from -20 to 80 °C - from -4°F to 176°F
Max. recommended length	4000 mm - 157.48 in
Average efficiency	70%

NOTE: the features are referred to remote control with flexible cables

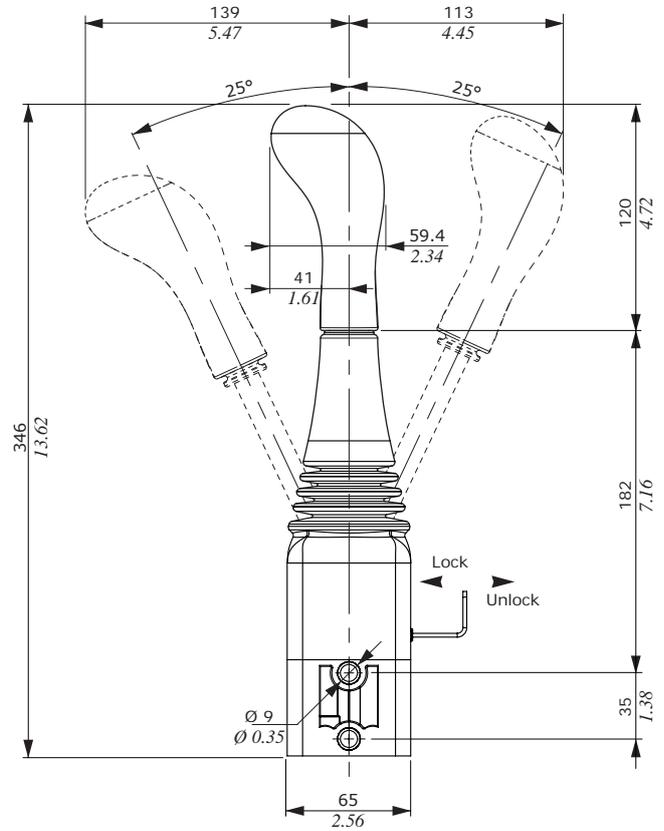

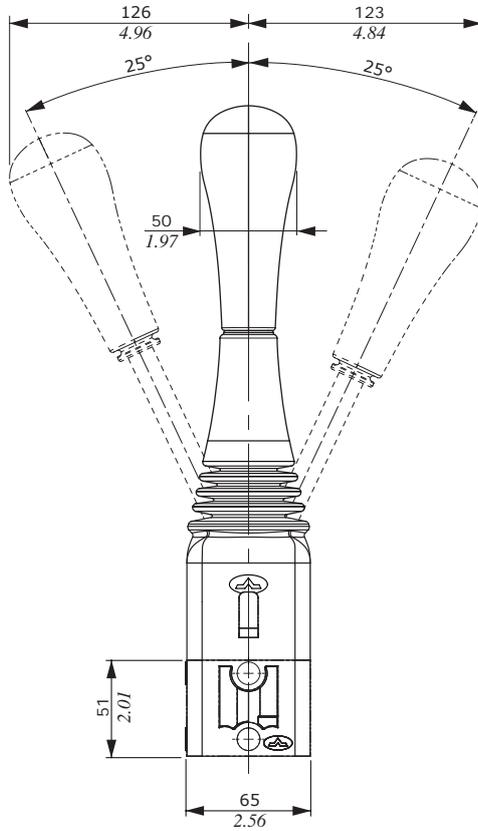

Features

Push-buttons

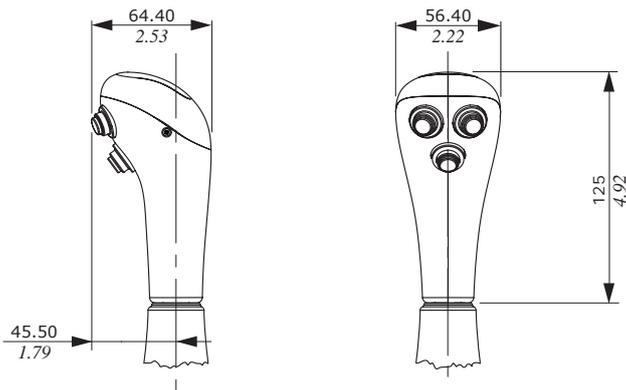

Current/voltage	6 A / 125 VAC 3 A / 250 VAC 3 A / 30 VDC
Mechanical life	10 ⁵ n° of operation
Electric life	25x10 ³ n° of operation
Operating force	9.3 N - 2.09 lbf
Weather protection	IP 64

Dimensions

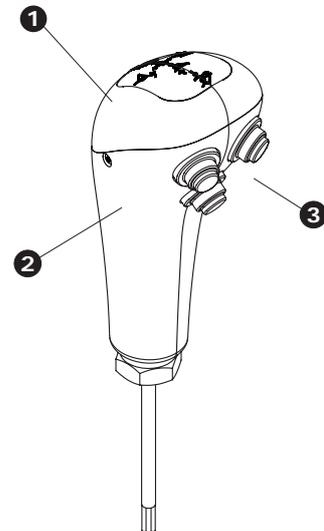

Configuration with FW type handle

Configuration with FWV type handle

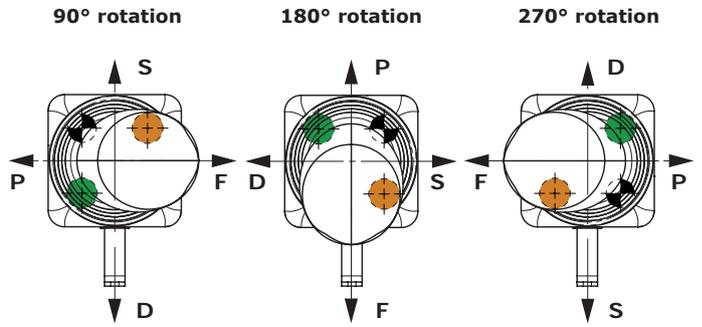

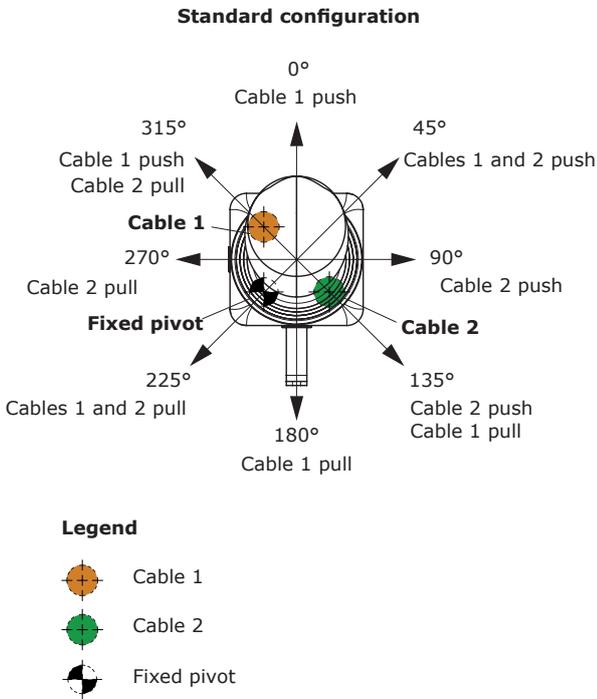

- 1) Upper half-shell
- 2) Bottom half-shell
- 3) K push-button

Operation and handle position

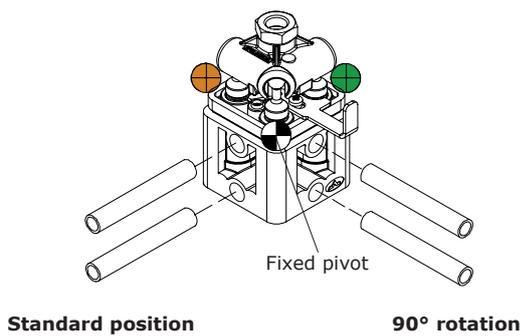

Handle can be mounted with 90° rotation step; the table below shows cables operation with handle in non-standard positions.

Handle operation direction	Handle mounting		
	90°	180°	270°
F Front	cable 2 push	cable 1 pull	cable 2 pull
P Rear	cable 2 pull	cable 1 push	cable 2 push
D Right	cable 1 pull	cable 2 pull	cable 1 push
S Left	cable 1 push	cable 2 push	cable 1 pull

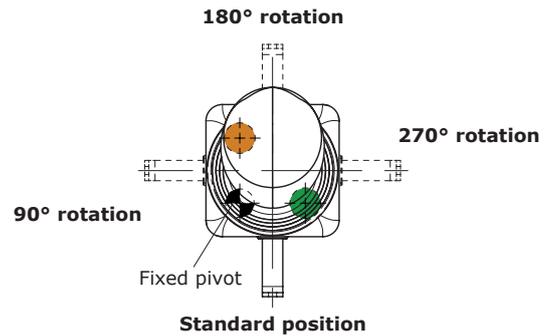

Body mounting

The position of the assembly bushing can be rotated 90° in order to allow the selection of the pilot valve fixing side.

Lock position

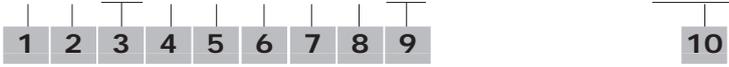

The mechanical lock can be mounted with 90° rotation step; its position refers to pivot's and cables' one.

NOTE – For parts code see SCF031 (previous page)

3 Handles

Available handles with custom length. Example:

TYPE	CODE	DESCRIPTION
S	-	Without handle, without handlever

Standard handle

FW	XAST481400	Standard without push-button, H 260 mm - 10.24 in
FWV-B	XAST482301	Standard up to 3 push-buttons and symbols according to UNI EN 12525, H 265.6 mm - 10.46 in

10 series handle

X	XAST281414	Push button with spring return, H 252 mm - 9.92 in
Z	XAST281415	Push-button with detent, H 254 mm - 10 in
Y	XAST281421	3 positions spring return rocker switch, H 252 mm - 9.92 in

Flexible cables

- High resistance and low actioning efforts
- Weatherproof resistance

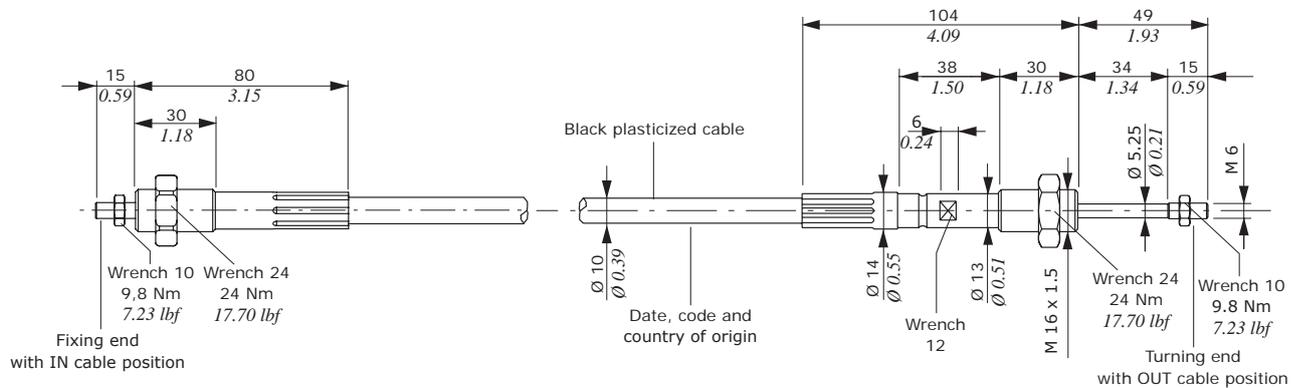

Working conditions

Max. load: in traction	1450 N - 340 lbf
in compression	880 N - 198 lbf
Minimum recommended bend radius	R = 150 mm - 5.9 in
Working temperature	from -40 to 80 °C - from -40°F to 176°F
Maximum recommended length	5000 mm - 157.48 in

Dimensions

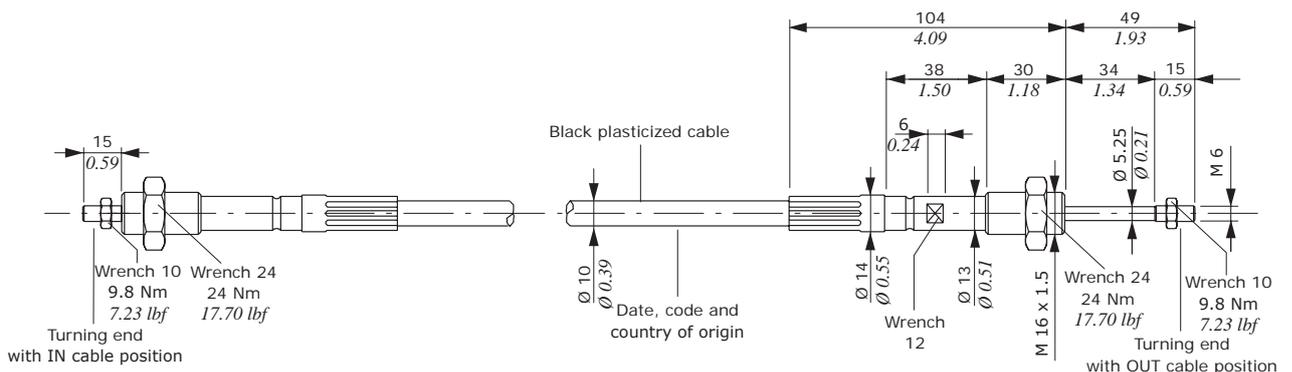

CD cable

Flexible polyurethane cable with 5 wires: $0.75 \text{ mm}^2 - 0.0012 \text{ in}^2$ (\varnothing external 5.2 mm - 0.20 in, \varnothing wire 1.55 mm - 0.06 in) with one fixing end and one turning end.

CG cable

Flexible polyurethane cable with 5 wires: $0.75 \text{ mm}^2 - 0.0012 \text{ in}^2$ (\varnothing external 5.2 mm - 0.20 in, \varnothing wire 1.55 mm - 0.06 in) with both turning ends.

Ordering codes for flexible cables

Connecting scheme

Flexible cables and connecting kit at both ends are used to join TCC or SCF control group to the directional valve.

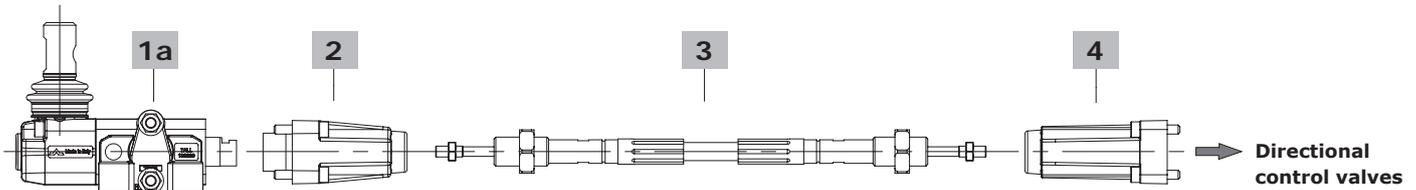

On the TCC series remote control there is always a GP kit; on the valve, the kit choice depends on the cable. The TP kit is used with CG cable with turning ends. The CP kit must be used instead of TP one when TL control is mounted on the valve, with the lever on the opposite side.

On the SCF031/32 remote control the TQ kit is assembled on the spool end side and it allows the connection of the cable to the directional valve. It's waterproof and it permits freedom of movement to fixed end cables.

4 Valve connection kit

See page 19

Performances

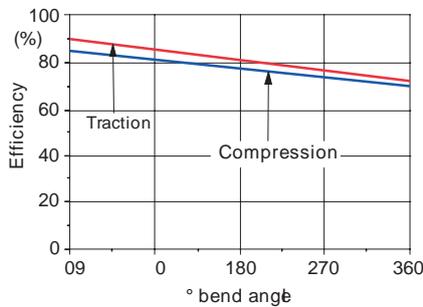

Total bend angle

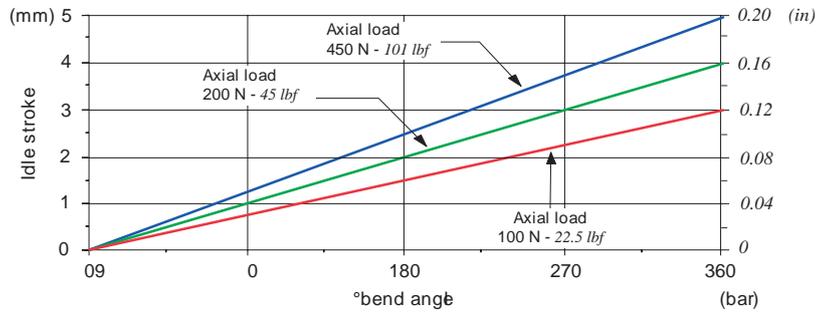

It results from the addition of bend curves in assembly, that are supposed calculated with minimum radius R=150 mm (5.90 in)

$$\alpha_{TOT} = \alpha_1 + \alpha_2 + \alpha_3 + \alpha_4 + \dots + \alpha_N$$

Efficiency computation

Idle stroke computation
