

Pressure switch

Type DV7.1

With one adjustable change-over switch

Superior conception

Piston type pressure switch with one change-over switch, easily adjustable over the entire pressure range, with scale for presetting of the pressure switching point.

Real Swiss quality

Designed for rough operating conditions, insensitive to hydraulic overloads, specially developed piston seal, housing made of anodized light metal alloy, degree of protection IP 65, with instrument plug according DIN 43650.

Easy to install

Ideal overall dimensions, can be mounted in any operation position, turnable under full pressure around the longitudinal axis, instrument plug turnable by 4 x 90°.

(HLP-oils according DIN 51524), other mediums on request.

Damping

For the protection of the pressure switch we recommend the installation of a damping element as for example a throttle screw with double fitting according to the table below.

Universal application

7 pressure ranges for the optimal adaptation to any operating pressure, suitable for mineral oils

Technical data

Type	Pressure [bar]	Overload max. [bar]	Part no.	Double fitting G 1/4" - G 1/4" Part no. 3683718		Double fitting G 1/2" - G 1/4" Part no. 3683678	
				Throttle screw mm	Part no.	Throttle screw mm	Part no.

Type DV7.1

With one adjustable
change-over switch

Electrical switching capacity

AC-15	2 A/ 125 V... 250 V
DC-13	2 A/ 30 V
DC-12	4 A/ 30 V

Wiring diagramme

General information

Switching hysteresis of the scale end value	5 - 10 %
Repeat accuracy of the scale value	1 %
Degree of protection	IP 65
Class of insulation	I
Standard	IEC 60947-5-1

Setting of the switching point

- (1) Bright scale-/spindle part
 - (2) Dark scale-/spindle part
 - (3) Spindle locking
- Loosen the spindle locking (3)
 - Combine the dark scale part (2) with the dark spindle part (2) for lower pressure setting and the bright scale part (1) with the bright spindle part (1) for upper pressure setting
 - Tighten the spindle locking (3)
