

AP INTERNATIONAL

4/3- directional- spool valve Solenoid-operated, direct acting 4 WE 10 J

SYMBOL

up to 120 l/min up to 320 bar

FUNCTION

HYDAC 4/3 directional spool valves in the series 4WE 10 J are directional valves for oil- hydraulic systems, which serve to open and close flow paths. In the de- energised mode the control spool is held in the rest position by the return spring. The actuation of the control spool occurs via an oilimmersed solenoid. The solenoid pushes the control spool from is rest position to is final position. This opens the required flow paths according to the symbol. When the solenoid is deenergised, the control spool is pushed back to the rest position by the return spring. A manual override permits the valve to be switched without energizing the solenoid.

FEATURES

- Direct-acting, solenoid-operated valve NW 10
- Economical and reliable due to simple design
- Oil- immersed solenoid armature for long life and low noise operation
- Solenoid coils can be replaced with no possibility of oil leakage
- Interface to DIN 24340 Form A10, ISO 4401
- Manual override

SPECIFICATIONS

port A,B,P: pmax= 320 bar Operating pressure: port T: pmax= 210 bar

Nominal Flow: max. 120 l/min

Media operating temp. range: min. -20°C up to max. +80°C Ambient temperature range: min. -20°C up to max. +55°C

hydraulic oil to DIN 51524 part1 and 2 Fluids: Viscosity range: 10 mm²/s up to 500 mm²/s is recommended Filtration:

Class 20/18/15 according to ISO 4406 or cleaner

15.000/h

Max. switching frequency: MTTF_d: 150 years

Installation: no orientation restrictions

Manual override: up to approx. 50 bar tank pressure possible

Seal materials: Standard FKM

Weight: 5,8 kg

Electrics

Type of voltage: DC voltage Voltage tolerance: ±10%

Nominal power: 42W (12V / 2,9A) or 48W (24V / 2,0A) Switching time: Switch-on time (coil): 80 ms up to 120 ms

Switch-off time (spring): 70 ms up to 110 ms

Switch-on time (coil with rectifier):

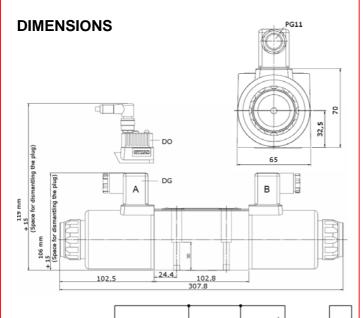

90 ms up to 130 ms

Switch-off time (spring): 160 ms up to 200 ms

Coil duty rating: Electrical connection: plug to DIN 43650

IP rating: IP 65 to EN 60529; DIN 40050 provided

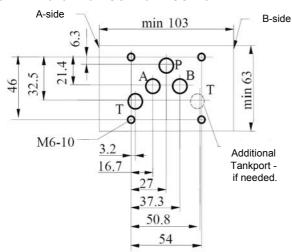

the connector is fitted correctly

INTERFACE

M12 coil Electric wiring

to DIN 24340-A10 / ISO 4401 / ISO4401

Mounting screws: M6 x 40 DIN 912-10.9

Torque: 10 + 1 Nm

Female connector and mounting screws (4 pcs.) must be ordered separately.

NOTE

The information in this brochure relates to the operating conditions and applications described. For applications or operating conditions not described, please contact the relevant technical department.

Subject to technical modifications.

MODEL CODE

Nominal voltage

12 = 12 Volt DC voltage

24 = 24 Volt DC voltage

96 and 205 Volt DC voltage on request (only type DG)

DG: DIN plug to EN 175301-803

Seal material

V = FKM (Standard)

N = NBR

Supply voltage +/- 10%	Nominal voltage of the DC-coil	Nominal power of the DC-coil
110 V – 50/60 Hz	96 V	42 W
230 V – 50/60 Hz	205 V	42 W
by using a female connector with integrated rectifier		

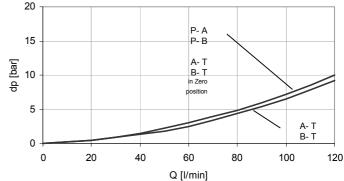

Standard models

Name	Part No.
4WE 10 J S01–12DG /V	6063154
4WE 10 J S01-24DG /V	6063163

other models on request

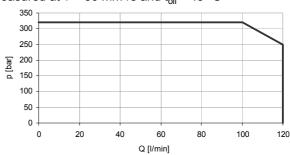

Pressure drop

Measured at $v = 36 \text{ mm}^2/\text{s}$ and $t_{oil} = 45 \,^{\circ}\text{C}$

Operating limits

Measured at $v = 36 \text{ mm}^2/\text{s}$ and $t_{oil} = 45 \text{ °C}$

The operating limits were determined using coils at operating temperature and 10% under voltage. The operating limits given are for applications with two flow directions. For flow in only one direction, the operating limits can be lower.

For operation with G96/G205 coils max. permitted flow rate shown in the graph must be reduced by 10%. The switch-on times will increase.
