

4/2, 4/3 WAY DIRECTIONAL VALVE KV-5KL

- NG 6
- Up to 350 bar [5 076 PSI]
- Up to 80 L/min [21 GPM]
- Connection diagram and connecting dimensions ISO 4401
- 5-chamber model with good spool guidance
- Optimized flow paths for low losses of pressure
- Low internal leakage
- Wet pin solenoid with interchangeable coil
- Manual emergency control
- Fulfil EMC (89/336/EEC)
- Packaging in carton box

KV-4/3-5KL-6

Operation

Directional valves type KV with direct solenoid operation control the direction of the hydraulic medium flow.

A valve basically consists of a housing (1), one or two solenoids (2a, 2b), control spool (3) and return spring (4).

In 4/3 way directional valves the centre position of the spool is defined by 4 return springs which hold the spool in the neutral position. The change over to the operating position (a) or (b) is done by energizing the solenoids (2a/ 2b) respectively, whereby the solenoid plunger acts on the control spool (3) via the operating pin (5), thus clearing the corresponding flow ways and establishing relevant links between ports P, A, B and T. When the solenoid (2a/ 2b) is deenergized, the control spool (3) is returned to neutral position by the return spring (4). In 4/2 way directional valves the centre position of the spool is defined by return spring on the opposite side of the solenoid (2a or 2b).

Change-over of the control spool (3) can be done manually by pressing the pin (6) for emergency manual override in the solenoid core.

Solenoid coil is fastened to the solenoid core (7) by retaining nut (8). Position of the coil (orientation of the connector) is pre-defined by the positioning hole on the valve housing and by the fixation pin (9) on the coil.

The operating limits of the valve are determined at a voltage 10% below the nominal rating. The curves refer to application with symmetrical flow throw the valve (P-A and B-T). In the case of asymmetric flow (e.g. one part not used) reduced values may result.

1. Solenoid coil "a" - Type **MR-045-O** (by default) or type **SR-045-O** (option S1 in model code)
2. Solenoid coil "b" - Type **MR-045-O** (by default) or type **SR-045-O** (option S1 in model code)
3. Solenoid core - Type **MR-045-O** (by default) or type **ACTUATOR SR-045** (option S1 in model code)
4. Fixing screws 4 pcs **M5x30 to ISO 476210.9**, not supplied with the valve; must be ordered separately
Required tightening torque: 9^{+/-} 10% Nm - steel tapped holes, 7^{+/-} 10% Nm - aluminium tapped holes
5. Plug-in connector EN 175301-803 "a" - grey - Type **MR-K-A**
6. Plug-in connector EN 175301-803 "b" - black - Type **MR-K-B**
7. Retaining nut - Type **MR-045-M** (by default) or type **SR-045-M** (option S1 in model code)
8. Retaining nut for manual override with rubber cover - Type **MR-045-M-G** (by default) or type **SR-045-M-G** (option S1 in model code)
