PRESSURE TEST DEVICES MI-001

DESCRIPTION

The MI-001 diagnostic case with pressure gauges is designed for measuring pressure and monitoring the operation of pressurized fluids. The diagnostic and hydraulic system adjustment kit is equipped with four pressure gauges. Thanks to two high-pressure test hoses, measurements can be performed simultaneously on two lines. The product ensures reliable and accurate pressure readings.

APPLICATION

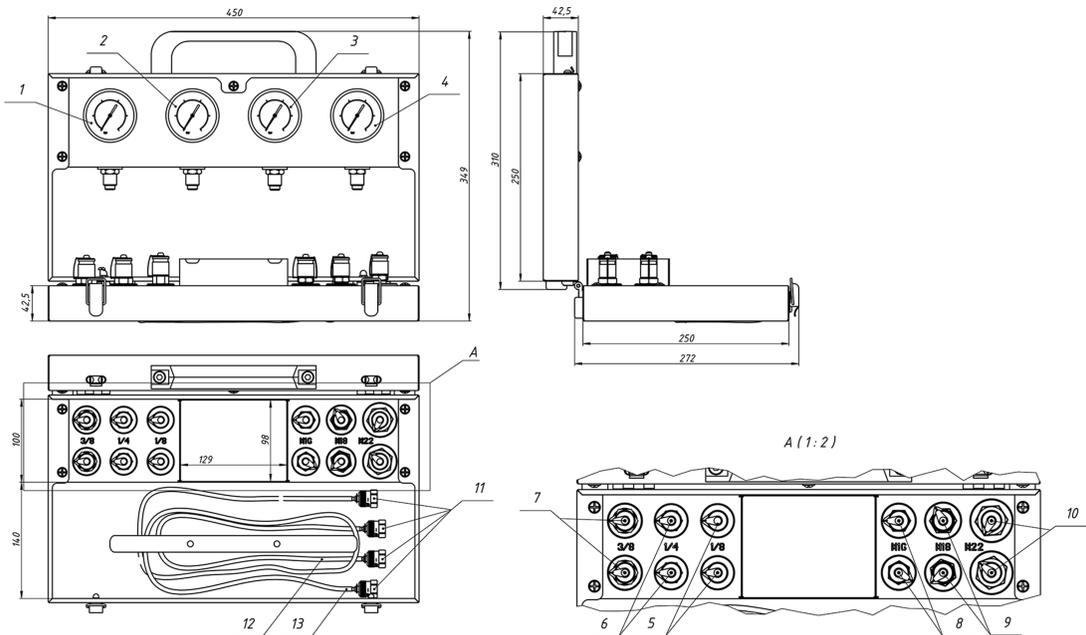

- Mobile and industrial hydraulics
- Automotive sector
- Hydraulic presses
- Heavy machinery
- Special-purpose vehicles (cranes, fire trucks, refuse trucks, etc.)
