

Z50

Z50

Simple compact and heavy duty designed monoblock from 1 to 8 sections for open and closed centre hydraulic systems.

- Fitted with a main pressure relief valve and a load check valve (individual check valve per spool – maximum 4 spools).
- Available with parallel and tandem circuit (only on 2, 3 and 4 spool valves)
- Optional power beyond port for parallel and tandem circuit
- Diameter 16 mm *0.63 in* interchangeable spools.
- A wide variety of options
- Floating spools and kits, regenerative spools and kits **do not** require additional machining on the body
- Actuation – manual, pneumatic, electro-pneumatic, hydraulic, electro-hydraulic, with solenoid and remote with flexible cable spool control kits.

Spool options:

Badestnost standard spool have the end shown in the drawing below.

Double acting spools

A Double acting spool, work ports closed in neutral position.

As Double acting spool, high metering, work ports closed in neutral position.

D Double acting spool, work ports open to tank in neutral position.

E Double acting spool, work port B open to tank in neutral position.

F Double acting spool, work port A open to tank in neutral position.

M Double acting spool, closed center, work ports closed in neutral.

Dd Double acting spool, closed center, work ports partially open to tank

Ed Double acting spool, closed center, work port B partially open to tank

Fd Double acting spool, closed center, work port A partially open to tank

Regenerative spools

Us

Double acting, 4 positions, regenerative position

Spool U requires spool positioner - 6 or 17, and it is available to valves ONLY with left hand configuration (P on left with respect to lever control)

Floating spools

K

Double acting, 4 positions, floating circuit in 4th position with spool out

Spool K requires spool positioner - 16 or 15, and it is available to valves ONLY with left hand configuration (P on left with respect to lever control)

L

Double acting, 4 positions, floating circuit in 4th position with spool in

Spool L requires spool positioner - 12 or 13, and it is available to valves ONLY with "R" right hand configuration (P on right with respect to lever control)

All spools have "R" version for right version of the valve, exceptions are Us, K and L.

To order right hand version of a spools, add "R" behind the spool description e.g. AR, BR, CR, etc.

To order low leakage version of spools, add "n" behind the spool description e.g. An, Bn, Cn, etc.
